Diversity and Distributions

Contents

Volume 10, Issue 1, January 2004

Biodiversity Research

S. J. Dark: The biogeography of invasive alien plants in California: an application of GIS and spatial regression analysis 1

G. Jakobs, E. Weber and P. J. Edwards: Introduced plants of the invasive *Solidago gigantea* (Asteraceae) are larger and grow denser than conspecifics in the native range 11

F. T. Maestre: On the importance of patch attributes, environmental factors and past human impacts as determinants of perennial plant species richness and diversity in Mediterranean semiarid steppes 21

R. Poulin: Parasite species richness in New Zealand fishes: a grossly underestimated component of biodiversity? 31

M. A. Ortega-Huerta and A. T. Peterson: Modelling spatial patterns of biodiversity for conservation prioritization in North-eastern Mexico 39

N. O'Dea, J. E. M. Watson and R. J. Whittaker: Rapid assessment in conservation research: a critique of avifaunal assessment techniques illustrated by Ecuadorian and Madagascan case study data 55

R. Z. Wang and Q. Gao: Morphological responses of *Leymus chinensis* (Poaceae) to the large-scale climatic gradient along the North-east China Transect (NECT) 65

Bibliodiversions

F. Glen: The decline of the sea turtles 75

C. W. Lafon: High biodiversity: an assessment of mountain biodiversity 75

N. Myers: Biodiversity paying its way 76

K. H. Shaltout: An updated flora of Egypt 77

M. Hutchings: Terrestrial orchids of the northern temperate zone 78

P. E. F. Collins: How our planet works? 78

M. Raghib-Moreno: The flora of Nicaragua 79

Volume 10, Issue 2, March 2004

Biodiversity Research

K. Jazdzewski, A. Konopacka and M. Grabowski: Recent drastic changes in the gammarid fauna (Crustacea, Amphipoda) of the Vistula River deltaic system in Poland caused by alien invaders 81–87

O. Defeo and R. S. Cardoso: Latitudinal patterns in abundance and life-history traits of the mole crab *Emerita brasiliensis* on South American sandy beaches 89–98

W. A. Hoffmann, V. M. P. C. Lucatelli, F. J. Silva, I. N. C. Azeuedo, M. da S. Marinho, A. M. S. Albuquerque, A. de O. Lopes and S. P. Moreira: Impact of the invasive alien grass *Melinis minutiflora* at the savanna-forest ecotone in the Brazilian Cerrado 99–103

K. C. Burns: Patterns in specific leaf area and the structure of a temperate heath community 105–112

J. L. Villaseñor and F. J. Espinosa-Garcia: The alien flowering plants of Mexico 113–123

S. Sarkar, C. Pappas, J. Garson, A. Aggarwal and S. Cameron: Place prioritization for biodiversity conservation using probabilistic surrogate distribution data 125–133

R. I. Colautti and H. J. MacIsaac: A neutral terminology to define 'invasive' species 135–141

C. Ricotta: A parametric diversity measure combining the relative abundances and taxonomic distinctiveness of species 143–146

K. Dehnen-Schmutz: Alien species reflecting history: medieval castles in Germany 147–151

Bibliodiversions

C. C. Daehler: Invasion Biology and our Feral Future 153–155

C. Alexander: Chinese plants and a few other things besides 156

T. Kuuluvainen: The Kluane Project: comprehensive boreal forest research 156–157

C. C. Daehler: EMAPi: A fresh source for invasive plant research 157–158

Volume 10, Issue 3, May 2004

Biodiversity Viewpoint

R. J. Petit: Biological invasions at the gene level 159–165

Biodiversity Research

M. A. Huston: Management strategies for plant invasions: manipulating productivity, disturbance, and competition 167–178

P. Pyšek, D. M. Richardson and M. Williamson: Predicting and explaining plant invasions through analysis of source area floras: some critical considerations 179–187

E. Rejmánková, J. Komárek and J. Komárková: Cyanobacteria — a neglected component of biodiversity: patterns of species diversity in inland marshes of northern Belize (Central America) 189–199

F. Salgueiro, D. Felix, J. F. Caldas, M. Margis-Pinheiro and R. Margis: Even population differentiation for maternal and biparental gene markers in *Eugenia uniflora*, a widely distributed species from the Brazilian coastal Atlantic rain forest 201–210

J. H. Vargas, T. Consiglio, P. M. Jørgensen and T. B. Croat: Modelling distribution patterns in a species-rich plant genus, *Anthurium* (Araceae), in Ecuador 211–216

A. M. Fosaa: Biodiversity patterns of vascular plant species in mountain vegetation in the Faroe Islands 217–223

W. Jędrzejewski, M. Niedziałkowska, S. Nowak and B. Jędrzejewska: Habitat variables associated with wolf (*Canis lupus*) distribution and abundance in northern Poland 225–233

Bibliodiversions

J. Turney: Putting it in writing 235

R. Field: Drakensberg flowers in all their glory 235–236

Volume 10, Issue 4, July 2004

Biodiversity Research

A. T. Peterson, E. Martínez-Meyer and C. González-Salazar: Reconstructing the Pleistocene geography of the Aphelocoma jays (Corvidae) 237–246

B. A. Hawkins and J. G. Pausas: Does plant richness influence animal richness?: the mammals of Catalonia (NE Spain) 247–252

T. N. Wharton and D. J. Kriticos: The fundamental and realized niche of the Monterey Pine aphid, *Essigella californica* (Essig) (Hemiptera: Aphididae): implications for managing softwood plantations in Australia 253–262

W. Ulrich and M. Ollik: Frequent and occasional species and the shape of relative-abundance distributions 263–269

T. Schmitt and J. Krauss: Reconstruction of the colonization route from glacial refugium to the northern distribution range of the European butterfly *Polyommatus coridon* (Lepidoptera: Lycaenidae) 271–274

N. J. B. Isaac and A. Purvis: The 'species problem' and testing macroevolutionary hypotheses 275–281

Z. Baruch, J. M. Nassar and J. Bubis: Quantitative trait, genetic, environmental, and geographical distances among populations of the C_4 grass *Trachypogon plumosus* in Neotropical savannas 283–292

J. C. Axmacher, G. Holtmann, L. Scheuermann, G. Brehm, K. Müller-Hohenstein and K. Fiedler: Diversity of geometrid moths (Lepidoptera: Geometridae) along an Afrotropical elevational rainforest transect 293–302

G. Eilu, D. L. N. Hafashimana and J. M. Kasenene: Density and species diversity of trees in four tropical forests of the Albertine rift, western Uganda 303–312

Bibliodiversions

K. J. Murphy: Dynamics of temperate lake ecosystems 313

S. Galatowitsch: Invasive aquatic species of Europe 313–314

Volume 10, Issue 5 & 6, September/November 2004

Special Issue: Plant Invasion Ecology

Editorial

D. M. Richardson: Plant invasion ecology — dispatches from the front line 315–319

Biodiversity Research

D. M. Richardson and M. Rejmánek: Conifers as invasive aliens: a global survey and predictive framework 321–331

J.-Y. Meyer and C. Lavergne: *Beautés fatales*: Acanthaceae species as invasive alien plants on tropical Indo-Pacific Islands 333–348

S.-H. Wu, C.-F. Hsieh, S.-M. Chaw and M. Rejmánek: Plant invasions in Taiwan: Insights from the flora of casual and naturalized alien species 349–362

Biodiversity Letters

I. Kühn, W. Durka and S. Klotz: BiolFlor — a new plant-trait database as a tool for plant invasion ecology 363–366

M. Rejmánek and J. M. Randall: The total number of naturalized species can be a reliable predictor of the number of alien pest species 367–369

Biodiversity Viewpoint

A. Pauchard, L. A. Cavieres and R. O. Bustamante: Comparing alien plant invasions among regions with similar climates: where to from here? 371–375

Biodiversity Research

J. Kollmann and M. J. Bañuelos: Latitudinal trends in growth and phenology of the invasive alien plant *Impatiens glandulifera* (Balsaminaceae) 377–385

J. H. Burns: A comparison of invasive and non-invasive dayflowers (Commelinaceae) across experimental nutrient and water gradients 387–397

F. J. Espinosa-García, J. L. Villaseñor and H. Vibrans: The rich generally get richer, but there are exceptions: Correlations between species richness of native plant species and alien weeds in Mexico 399–407

T. D. Rambuda and S. D. Johnson: Breeding systems of invasive alien plants in South Africa: does Baker's rule apply? 409–416

I. Kühn, M. Brandenburg and S. Klotz: Why do alien plant species that reproduce in natural habitats occur more frequently? 417–425

L. C. Foxcroft, M. Rouget, D. M. Richardson and S. M. Fadyen: Reconstructing 50 years of *Opuntia stricta* invasion in the Kruger National Park, South Africa: environmental determinants and propagule pressure 427–437

J. C. Volin, M. S. Lott, J. D. Muss and D. Owen: Predicting rapid invasion of the Florida Everglades by Old World Climbing Fern (*Lygodium microphyllum*) 439–446

E. C. Underwood, R. Klinger and P. E. Moore: Predicting patterns of non-native plant invasions in Yosemite National Park, California, USA 447–459

M. P. Robertson, M. H. Villet and A. R. Palmer: A fuzzy classification technique for predicting species' distributions: applications using invasive alien plants and indigenous insects 461–474

M. Rouget, D. M. Richardson, J. L. Nel, D. C. Le Maitre, B. Egoh and T. Mgidi: Mapping the potential ranges of major plant invaders in South Africa, Lesotho and Swaziland using climatic suitability 475–484

H. Greenwood, D. J. O'Dowd and P. S. Lake: Willow (*Salix* × *rubens*) invasion of the riparian zone in south-eastern Australia: reduced abundance and altered composition of terrestrial arthropods 485–492

E. I. Badano and F. I. Pugnaire: Invasion of *Agave* species (Agavaceae) in south-east Spain: invader demographic parameters and impacts on native species 493–500

Biodiversity Letter

R. J. Hobbs: The Working for Water programme in South Africa: the science behind the success 501–503

Bibliodiversions

P. Pyšek: The most complete global overview of invasive species in natural areas 505–506
A. Welz: Winning concept seeks work 506–507

M. Williamson: Invasive species: vectors and management strategies 508
